

CERTIFICATE

The AluEco Foundation promotes sustainability. Amongst other things, it ensures management of a market-standard recycle chain in the façade construction sector. Participating companies reuse aluminium in this recycle chain, guaranteeing high-quality and sustainable use of this metal. In addition, AluEco encourages the use of modern façade technology for sustainable buildings.

The name of the AluEco Foundation member

De Mors BV
in RIJSSEN

Registration number

E26_2459

The participant herewith declares that

1. It endorses the objectives of the AluEco Foundation and will do everything within its ability to ensure that construction aluminium enters the AluEco recycle chain.
2. It will ensure that as much high-quality recycled construction aluminium as possible is made available in the market.
3. It will contribute towards the creation of sustainable buildings using modern façade technology.

The AluEco Foundation herewith declares that

If a participant is unable to meet its obligations under points 1, 2 and 3, the Foundation will help the participant to comply with these.
